Enterprise Business Capabilities One (EBC One)
Transforming Air Force Digital Business Operations

RICH ALDRIDGE
AIR FORCE PROGRAM EXECUTIVE OFFICER, BUSINESS AND ENTERPRISE SYSTEMS
The Imperative: A Warfighter View

Joint, All Domain Lethality and Readiness, At the Speed of Relevance
The Imperative: USECAF View
Air Force Digital Business Operations

We will:
- Improve and Strengthen Business Operations Through Enterprise or Shared Services
- Reduce Administrative and Regulatory Burden
- Optimize Organizational Structures
- Undergo an Audit and Improve the Quality of Budgetary and Financial Information

“...we must evolve our business management practices to support the warfighter at the speed of relevance.”

Matthew P. Donovan
Undersecretary of the Air Force
Meeting the Imperative
BES 2.0 (and Beyond)

Why?
• Deliver enterprise business capabilities that drive competitive advantage against our adversaries

What?
• Shed legacy management practices and structures; flatten the organization
• Increase speed of capability delivery to users while eliminating duplicative systems
• Relentlessly engage customers and users, and add value to every engagement
• Execute rapid, iterative approaches from design, through development, to fielding
• Be fully accountable for the value of every dollar we’re entrusted with; achieve full auditability

How?
• Agile mindset, top to bottom, across the entire organization
  • We’re not “doing” Agile, we’re being Agile
• Focus on business outcomes, not business systems
• Learn from best practices; shift the organization from program to product management structures
• Harvest capacity by leveraging shared services across the organization
Reimagining PEO BES

BES 2.0: Product Management and Shared Services

What Does BES 2.0 Mean to Me

1. Empowers leaders at all levels to delight our users
2. Transitions BES to an organization using best practices and modern tools for delivering IT services at the speed of relevance
3. Drives standardization and consolidation to reduce complexity and costs
4. Enables innovation at all levels of the organization
5. Improved unity of effort by eliminating non-value added activities and working as one Directorate towards common outcomes
Enterprise Business Capabilities One (EBC One) Concept View

- A Fortune 100 Approach to Business
- Loosely Coupled Environment
- Greater focus on data sources and data management
- More workloads moving to the Cloud
- IT and business are inextricable, enabling operations from the edge to the Cloud
- Increased focus on what needs to be integrated, and how, to drive outcomes
- Business processes that span functional silos and cross multiple applications
- Flexible and Agile processes driving shorter time to value
